"For anyone who has ever loved an animal, this book, like no other non-fiction, takes you through the full spectrum of emotions: from sadness to anger, from fear to hope. But redemption? That is ultimately left up to each and every one of us... This book deserves your immediate attention and our beloved animals deserve your immediate action." – Lee Rayburn, *Host, Air America Radio*.

"Millions of healthy and adoptable dogs and cats are put to death in animal shelters every year. That their deaths are unnecessary is the premise of Winograd's unique and important book, which establishes a blueprint for the creation of no-kill shelters... The way out, he argues persuasively, is for shelters to implement comprehensive no-kill plans, which include reaching out to the community, care and rehabilitation, adoption and fostering, and sterilization of both pets and feral cats. Winograd skillfully recounts the stories of several communities that have used this "no-kill equation" to drastically reduce the killing in their animal shelters, demonstrating that, contrary to popular belief, a place can be found for every homeless pet in America. Recommended for public and academic libraries." – *Library Journal* (www.libraryjournal.com)
